## Objective

To perform challenging work that will utilize my technical and analytical skill on the Linux/Unix platform to create useful applications and technology.

## Summary

I have been working for over 5 years. Currently I am working on virtualization and storage optimization applications. Before this I have worked on the development and maintenance of the deepOfix Mail Server, a Linux distribution meant to run email servers.

## Technical Skills

### Programming Languages

C, Perl, Python, Ruby, Scheme

### Development

- Knowledge of UNIX system programming (System calls, basic library functions, networking, etc)
  - Linux kernel filesystems (ext2 and ext3) and device-mapper (dm) driver internals.
  - Excellent understanding of the UNIX and Linux ecosystem:
  - Excellent knowledge of Bash scripting and automation.
  - Experience with installation and maintenance of Email server infrastructure.
  - Linux firewall, VPN and router configuration.
- Development of distributed server applications with python and erlang.
- ORM (Object-Relation Mapping) frameworks like Storm, SQLAlchemy
- Experience with the MVC (Model-View-Controller) model of application development (Catalyst, Django)
- Packaging software and maintenance of such packages. (Debian and RPM packages)

### Tools

- Version control systems including Git, Mercurial, Subversion, CVS.
- Build software including make, GNU Autoconf.
- Project management with Trac, Bugzilla, Request-Tracker

## Work Experience

### Atlantis Computing Pvt. Ltd. (Aug 2008 till present)

- Development of features and bug fixing on the core of the product, which is a python based distributed server application to manage and enhance the performance of virtual machine disk images.
- Worked on converting the product from a centralized architecture to a distributed architecture to support larger scale of users and workload.
- Helped build a Linux live-cd based installer for the product. This involved development of modules for setting up VMware ESX server and configuration of virtual machines and applications. The installer was built as a python application which itself ran on a virtual machine.
- Wrote a Windows MFC application to monitor and report health of Virtual Machines. This application runs on user virtual machines and responds to commands sent over a TCP/IP socket.
- Implemented a high availability solution for failover of services provided by the product using heartbeat, DRBD (Distributed Replicated Block Device) and OCFS2 (Oracle Clustered File System)
- Also performed various infrastructure tasks on vmware and related tools. This involves installation and configuration of vmware

ESX servers and the Linux based virtual machines on which the product runs.

### **DeepRoot Linux Private Limited. (Sep 2006 to July 2008)**

- Support, development and maintenance of the deepOfix Mail Server, a GNU/Linux distribution built to run email services.
- Rebuilt the entire installer and package set over a period of six months to make the entire system more manageable and upgradable.
- Fixed bugs and added features to various open source software used by the product. and contributed them up-stream where ever possible.
- Headed the support team, comprising four people to provide incident support and customizations for the above product and allied services.
- Support and maintenance of OpenVPN VPN installations.
- Setting up fax servers based on the HylaFAX fax software.
- Installation of SubVersion VCS's and Trac and helping new users use it.
- Wrote patches for internal use for software such as Qmail, Dovecot, etc. Responsible for 200 servers in my support role.

### **Maspro IT Solutions Private Limited (Dec 2005 to Aug 2006)**

- Worked as an on-site engineer performing Systems Administration tasks, first at EthicSoft, Jayanagar in Bangalore and then at Resolve India, a division of Tally Solutions.
- At EthicSoft, was responsible for the corporate LAN, including email services, firewalls, and the test servers for various projects at the company.
- Implemented a version control system using CVS. Created an automated commit-compile-build-deploy system on the above test servers. Consulted on development of a firewall/gateway security appliance for one of the projects at EthicSoft.
- At Resolve India, I was responsible for the maintenance of the LAN, Windows based terminal servers, firewall, email servers etc, as a Systems Administrator.

### **Educational Background**

- I am a B.E. in Industrial and Production Engineering, from Basaveshwara Engg. College, Bagalkot, Karnataka in 2005.
- I grew up and went to school in Dharwad, Karnataka. I took an extra-curricular interest in Linux and programming during my engineering course.
- I have participated, and won prizes in Quiz competitions both at the college level as well at inter- collegiate competitions. I represented my Engg. College at the sixth VTU Youth Festival held at BIET, Davanagere, in 2005.
- After graduation, I took a six month course in Unix programming at Uttara, at Rajajinagar in Bangalore.

### **Other Interests**

I play the Tabla. I have cleared the first level (Prathama) examinations on the Tabla. I have also given accompaniment on the Tabla at several light music events.

### **Personal Details**

Full name: Abhijit Pralhad Hoskeri  
Father's name: Pralhad B. Hoskeri  
Date of birth: 14th November, 1983  
Email: abhijithoskeri@gmail.com  
Cell phone: 99866 84203  
Home phone: 0836 2440927  
Current address: 199, 8th Main, Seethappa colony  
New Thippasandra, Bangalore  
Permanent address: C/o P. B. Hoskeri, 'Banashankari',  
Sanmati Marg, Dharwad 580001.  
Languages known: Kannada, English, Hindi

### **Declaration**

I hereby submit that the information given above is correct to the best of my knowledge and belief.
